

## **WORKSHOP ON COMMUNICATION SKILLS:**

Under the dynamic leadership of Associate Dean Research Prof. Dr Bushra Iftikhar, Research Cell of Khyber Medical College organized two days workshop on communication skills. The interactive sessions were facilitated by the consultant WHO Dr. Durdana Poonam and Associate Prof. Community Medicine Dr. Romana Ayub.

The facilitators briefed the participants about verbal and non-verbal communication which is an important yet lacking skill in people and organisations. Positive communication is not all about speaking but understanding different communication styles, listening, body language, tone and adapting your message to the situation.

In the last a role play was enacted by Prof Dr Naeem and Dr Kashif Rehman to demonstrate the impact of different communication styles.
